FULL-STACK WEB & SOFTWARE DEVELOPER

Nabeul, Tunisia | (+216) 27 870 862 | bousminaselim@gmail.com
portfolio-eight-pink-42.vercel.app | github.com/slimecoding2025

PROFESSIONAL SUMMARY

Self-taught full-stack developer and Computer Science student, focused on building modern, high-performance web applications, AI-driven solutions, and cybersecurity-themed interfaces. Hands-on experience across frontend, backend, and database layers, with a strong commitment to clean, scalable code and polished UI/UX.

EDUCATION

Licence en Technologies de l'Informatique **2026 – Present**
ISET Nabeul, Tunisia

- Higher education in computer science covering software development, databases, algorithms, and information systems.

Baccalaureate in Computer Science (Sciences Informatiques) **Graduated June 2026**
Lycée Rue Ali Belhouane, Nabeul, Tunisia

- Focused on algorithmic logic, database design, software development fundamentals, mathematics, and physical sciences.

KEY PROJECTS

Nexora Agency Platform

- Designed and shipped a modern digital agency landing page with a dark-mode UI, custom typography, and high-performance interactive components using Next.js, React, and Tailwind CSS.

Bac Fel Jib AI

- Developed an AI-powered educational assistant for Tunisian Baccalaureate students, featuring dynamic chat interaction, essay-writing methodology, and exam-prep tools.

AEGIS Security Console

- Built a high-contrast, cyber-themed web console featuring terminal simulations, real-time security dashboards, and responsive layouts.
